

Code-Layout, Readability and Reusability

Date	15 March 2024
Team ID	XXXXXX
Project Name	AI Smart Patient Appointment & Medication Reminder System
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout	yes	Proper indentation maintained across HTML, CSS, JavaScript, and Google Apps Script file
2	Proper File Structure	Files and folders are logically organize	Yes	Project organized into backend, css, js folders with separate HTML pages.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Descriptive variable names used for appointments, medications, reports, users, and summaries.
4	Function / Method Names	Functions are descriptively named	Yes	Functions such as addAppointment(), generateSummary(), sendSMS(), getLogs(), and updateRecord() clearly describe their purpose
5	Code Comments	Inline and block comments explain log	yes	Important sections and API integration logic are documented with comments.
6	Modular Design	Code is split into reusable functions/m	yes	Separate JavaScript modules manage appointments, medications, reports, dashboard, health records, and AI summaries.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Common functionality reused through modular JavaScript files
8	Error Handling	Exceptions and errors are handled gra	yes	Input validation, API response handling, and error messages improve reliability.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technolog	yWhere Reused	Reusability Level (High / Medium / Low)
1	Login Module	HTML, CSS, JavaScript	User Authentication	High

2	Appointment Module	JavaScript	Dashboard, Reports	High
3	Medication Module	JavaScript	Dashboard, Reminder system	High
4	Report Module	JavaScript	Health Report Generation	High
5	Google Apps Script Backend	Google Apps Script	CRUD Operations, API Handling	high

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-organized project with separate frontend, backend, and reusable modules.
Readability	4	Code uses descriptive variable names, functions, and consistent formatting.
Reusability	5	JavaScript modules and backend functions are reusable across different features.
Documentation / Comments	4	Code includes meaningful comments for important sections and API integrations.
Overall Score	5	The project follows modular architecture, clean coding practices, and is easy to maintain and extend.
